

December 12th

Would you take care of this for me, please. Note it should go out at once - I just saw it today.

We would be pleased to have claims identical to the issued U.S. Case. I don't think the specification was amended; I'm sure you'll check.

Also, you'd better give Langner the arguments re broadness in "organic solvents" - the specification contemplates it.

And - in the -338 Foreign file - you will find that Langner hatched and filed a few jibberish claims in several countries and had to amend. I suspect this is the amendment to 2, 3 and 8 referred to. But please check.
